

Suggested focus questions for this activity

Task 1

What is grazing?

- What is happening in the video clips?
- What can you see? What are the animals doing as they graze?
- How are the animals grazing differently? Why do you think they graze in a different way?
- What can you hear?
- Are the sounds different depending on how they eat? How are they different?

Task 2

How do humans eat?

- What is happening in the video clips?
- What can you see? How are the humans eating? Why do you think they eat like this?
- How is this different to grazing animals? How is it similar?
- What sounds can you hear?
- Are the sounds different to grazing animals? How are they different?

Task 3

What do we know about human footprints?

- Where do you see human footprints? Why do you see them in these places?
- What do they look like?
- What do they remind you of? Why?
- What else do you know about human footprints? How do you know these things?

Task 4

What can we find out by observing our footprints?

- Are the footprints all the same? How do you know? What are the differences?
- Are some footprints deeper than others? Why do you think that is?
- Who in your group will have the longest/shortest footprint? Why do you think that?
- Who in your group will have the widest/narrowest footprint? Why do you think that?
- What does your footprint look like?
- Does it look like you expected? Why?
- How will you measure your footprint? Why do it like that?
- How long/wide do you think your footprint is? How do you know that?
- Measure it - how close was your estimate?
- How will you know who has the longest/shortest/widest/narrowest footprint?
- What's the best way of comparing the footprints? Why is this the best way?

Task 5

How do adult footprints compare?

- What do you think the parent/carers footprints will look like? Why?
 - How will they be different/similar? Why do you think that?
- Ask them to stand in paint and make some footprints!
- What do the footprints look like? How good were your predictions?

Task 6

What might the footprints of grazing animals look like?

- What grazing animals do you know? How do you know these are grazing animals?
- What do you think their footprints will look like? Why do you think this?
- How will the footprints of a sheep, cow and horse look different/similar? How do you know?
- How will the footprints be different/similar to human footprints? Why do you think that?

Task 7

How do our footprints compare to the footprints of grazing animals?

- What animal does this footprint belong to? Why do you think that?
- How does it compare to the drawings you made?
- What surprises you about these footprints? Why?
- How will you use the internet to search for images of grazing animal footprints? Why do it in this way?
- How will you know the images you find are definitely of these grazing animals?
- What images did you find?
- What were the best websites for images of grazing animals? Why do you think these are the best?
- How did the images you found surprise you?
- How close to the images were your drawings? What were the differences?
